

SOP and C2 Alignment

Gain maximum value from your C2 System

The adoption of a new C2 system may require updates to existing procedures and working practices. Our knowledgeable domain experts and C2 architects will help you to align your current operational procedures with the capabilities of the SitaWare suite so that you gain maximum benefit from the new C2 system

C2 Systems introduce new possibilities

- Existing SOP is based on older and fragmented IT solutions or manual procedures
- Deploying a new C2 system may require updates to existing procedures and working practices so that users can take a full advantage of the system

Get the most from your C2 System

- Participants will gain knowledge of Systematic SitaWare suite capabilities, and how they fit into current Doctrine/SOP
- The opportunity to build knowledge about the kind of changes to SOP that would be most beneficial

Service Content

- Service is delivered as a two day workshop on Customer premises
- Customer participation should include technical experts and operational users
- Systematic's participation will include experienced domain expert and C2 architect personnel

Service Outcome

- Based on discussions in the workshop, a report will be delivered identifying the gap between current Doctrine/SOP and available SOP and Doctrine in the SitaWare Suite
- A follow up meeting will be conducted where the content of the report will be explained

Simplicity Trust Performance Forward-thinking

About Systematic

Systematic is an internationally renowned software company with over 450 highly qualified employees. We provide scalable software products, services and projects for defence forces, security organisations and systems integrators. With offices in Denmark, Finland, UK and USA, we are delivering solutions globally to over 40 countries and more than 100,000 users worldwide.

Our ability to simplify critical decision making is based on our core competences within information management, application integration and interoperability. We focus on quality and process maturity. The maturity of Systematic and the quality of our software are of the highest standard, which is demonstrated by our CMMI Level 5-certification.
