

SitaWare C2 Solution Design

Bridging between operational needs and technical possibilities

Once your C2 concepts have been proven, Systematic's specialists will work with you to ensure the planned system's technical specification meets current and future operational requirements

Translate operational needs into a technical solution

- How to solve specific operational needs into a new C2 system is difficult
- A new IT system will bring new possibilities that will allow for solving operational needs in a different way than today
- Design construction must cover all aspects of operational needs as re-working decisions can be very expensive

Get an operational based design for your C2 Solution

- Participants will gain an understanding of how to cover different operational needs using the Systematic SitaWare suite

Service Content

- Service is delivered as a two day workshop on Customer premises
- Customer should participate with Technical Experts and Operational Users
- Systematic's participation will include experienced domain expert and C2 architect personnel

Service outcome

- Based on the discussions at the workshop a report will be delivered that presents design and architecture examples to support the identified operational needs
- Report will include diagrams for suggested deployment and data flow
- A follow up meeting will be conducted where the content of the report will be explained

Simplicity Trust Performance Forward-thinking

About Systematic

Systematic is an internationally renowned software company with over 450 highly qualified employees. We provide scalable software products, services and projects for defence forces, security organisations and systems integrators. With offices in Denmark, Finland, UK and USA, we are delivering solutions globally to over 40 countries and more than 100,000 users worldwide.

Our ability to simplify critical decision making is based on our core competences within information management, application integration and interoperability. We focus on quality and process maturity. The maturity of Systematic and the quality of our software are of the highest standard, which is demonstrated by our CMMI Level 5-certification.
