

SITAWARE

SitaWare C2 Adaptation and Integration

Integrate C2 COTS to achieve full value

Systematic's SitaWare suite of C2 software fulfils all core operational requirements right off-the-shelf, but can also be extended and integrated with bespoke or third party products development due to its open application programming interfaces and web services

Extend and integrate C2 COTS to specific needs

- Modern C2 products provide comprehensive capabilities off the shelf – but value can be increased via local integrations and extensions
- Expand C2 products with local sensors and feeds to increase soldier situational awareness in the battlefield
- Adaptation requires proven software development skills combined with in-depth knowledge on products capabilities

Working together on a high quality solution

- Jointly rework requirements with Systematic to gain a coherent picture of operative needs, possible solutions and create a joint delivery plan
- Close cooperation to extend COTS C2 products via open interfaces reduces delivery timescales and ensures products are fit-for-use
- Build upon Systematic's CMMI level 5 mature software development process to ensure timely delivery and high quality

Specific content

- Joint planning workshop, to create a common plan based on operational needs and software solution. Conducted at Customer facilities
- Following joint suggested plan, the solution is offered as a Firm Fixed Price project - to reduce customer risk
- Development of agreed adaptations and integrations will be based on Systematic's CMMI level 5 certified software processes
- Delivery of developed integrations into Customer test facilities or initial fielding tests

Work with skilled IT professionals

- Workshop shall be conducted by highly skilled project managers, solution architects and experienced domain experts
- Development and delivery performed by software engineers and software testers with in-depth knowledge of Systematic Defence products and the military domain

Prerequisites

- The customer must provide a Solution Description and requirements list. A template can be acquired from Systematic via the C2 Solution Design service

Simplicity Trust Performance Forward-thinking

About Systematic

Systematic is an internationally renowned software company with over 450 highly qualified employees. We provide scalable software products, services and projects for defence forces, security organisations and systems integrators. With offices in Denmark, Finland, UK and USA, we are delivering solutions globally to over 40 countries and more than 100,000 users worldwide.

Our ability to simplify critical decision making is based on our core competences within information management, application integration and interoperability. We focus on quality and process maturity. The maturity of Systematic and the quality of our software are of the highest standard, which is demonstrated by our CMMI Level 5-certification.
