

SitaWare Deployment

From software to operational success

System deployment can be a complicated process that requires both IT and operational skills. Our experienced project managers, system architects and domain advisors will work with you to build a ready-to-deploy C2 system based upon available hardware, operational requirements and infrastructure

Release the potential of your SitaWare C2 system

- Software provides real value only when it is operationally deployed
- The system deployment process is complicated and requires experience in both IT and operations

Get your SitaWare C2 System ready for operational use

- SitaWare installed
- Third party auxiliary software needed by SitaWare installed
- SitaWare configured to fit operational procedures
- Technical and operational staff trained (optional)
- Helpdesk initiated (optional)

Work with skilled system integrators

- The C2 deployment service is planned and managed by experienced project managers and system architects
- Installation, integration and optional training of technical staff is delivered by technicians specialist knowledge of and add highly experience before infrastructure specialists SitaWare deployment and by infrastructure specialists
- Optional training of operational staff is provided by consultants with operational experience in the defence domain
- Systematic's knowledge is shared with your technical and operational staff so they are ready to take over responsibility for the system

Receive help throughout the deployment process

- Systematic and the Customer participate in a shared deployment conference at the Customer premises, the Solution Description is assessed together with any other input to the deployment process
- Systematic creates a deployment plan subject to a joint review via video conference
- Systematic performs on-site installations in working closely with customer technicians
- Systematic delivers a Deployment Report to be assessed in jointly via video conference

Prerequisites

- The customer must provide a Solution Description. This can be acquired from Systematic via the C2 Solution Design service

Simplicity Trust Performance Forward-thinking

About Systematic

Systematic is an internationally renowned software company with over 450 highly qualified employees. We provide scalable software products, services and projects for defence forces, security organisations and systems integrators. With offices in Denmark, Finland, UK and USA, we are delivering solutions globally to over 40 countries and more than 100,000 users worldwide.

Our ability to simplify critical decision making is based on our core competences within information management, application integration and interoperability. We focus on quality and process maturity. The maturity of Systematic and the quality of our software are of the highest standard, which is demonstrated by our CMMI Level 5-certification.
